Top Skills

Prompt Engineering
Full-Stack Development
Retrieval-Augmented Generation (RAG)

Languages

English (Full Professional)
Amharic (Native or Bilingual)

Certifications

Introduction to Large Language Models
Introduction to Natural Language Processing
Machine Learning with Python
Natural Language Processing with Classification and Vector Spaces
Exploratory Data Analysis for Machine Learning

Honors-Awards

Top Problem Solver
2nd Place Victory: \$600 Prize in A2SV Champions League 2023
EtCPC Competitive Programming - Third Prize Winner
A2SV Internship Finals - Third Place Prize: \$1,250
Winner of Devfest 2022 Hackathon Hosted by GDG Addis

Birehan Zewdie

AI Software Engineer | ML Engineer at the COOL company
Dubai, United Arab Emirates

Summary

I am an ML/AI Engineer with a degree in Software Engineering specializing in Artificial Intelligence. My education provided a solid foundation in computer science and AI, and at A2SV, I solved around 1,000 algorithm problems, ranking among the top solvers. As the valedictorian of the 10 Academy program, I completed ten projects in machine learning, data engineering, web3, and generative AI. I work as a Junior Machine Learning Engineer at Adludio, a smart advertising company, where I tackle challenging projects that enhanced my skills and bring value. Ambitious and focused, I strive to make a meaningful impact in my field.

Experience

the COOL company
ML Engineer
May 2025 - Present (1 year)
New York, United States

Adludio
Junior Machine Learning Engineer
May 2024 - May 2025 (1 year 1 month)
London England United Kingdom

- Developed inventory scoring system using DCN and LTR algorithms to drive conversion prediction and optimize Bid Adjustment, which resulted in significant KPI improvements and higher profit margins.
- Implemented an automated campaign pacing algorithm that dynamically tunes daily and hourly budget limits based on predictive modeling, enabling real-time bid adjustments and balanced spend to optimize margins and maximize overall campaign ROI.
- Developed a creative scoring system that leverages historical data and LLMs to assess user behavior and variations in creatives (such as format, position, color, and arrangement), allowing for the selection of high engagement ad creatives.

- Created a pipeline using LLM agents and historical data to generate creative design concepts aligned with brand guidelines, product details, targeting, KPIs, and campaign objectives.

Eskalate

AI Software Engineer | Team Lead

March 2023 - April 2024 (1 year 2 months)

Addis Ababa, Ethiopia

- Led a team of 18 to develop HakimHub, Ethiopia's first medical information recommendation system, revolutionizing healthcare technology with AI-driven solutions.
- Leveraged advanced LLMs to personalize symptom assessments and follow-up queries, delivering accurate recommendations for specialized doctors and nearby hospitals.

A2SV | Africa to Silicon Valley

1 year 3 months

Head of Remote Education

October 2023 - December 2023 (3 months)

Addis Ababa, Ethiopia

- Led education initiatives at A2SV, training African students in data structures, algorithms, and software development. Measured success by delivering engaging lectures and organizing coding contests to enhance problem-solving skills.
- Oversaw the data structures and algorithms track, preparing course materials and conducting progress meetings to ensure student growth. Organized mock interviews to simulate real-world scenarios, fostering practical learning.
- Empowered African students with technical and soft skills for software development. Delivered hands-on training and support, guiding students to apply their skills effectively in real-world scenarios.

Software Engineering Fellow

October 2022 - September 2023 (1 year)

Addis Ababa, Ethiopia

- Completed A2SV's 1-year software engineering fellowship, mastering algorithms, data structures, and web development.
- Proficient in solving 1000+ coding problems, including 850+ on LeetCode and 200+ on Codeforces.

- Applied theoretical knowledge to real-world scenarios, enhancing algorithmic thinking and software development skills, while gaining experience in teamwork, pair programming, and English for interviews.

AiQEM Tech

Software Engineer

July 2023 - September 2023 (3 months)

Addis Ababa, Ethiopia

- Developed a user-friendly React-based dashboard for AiQEM Tech, focusing on visualizing campaign statistics.
- Implemented interactive charts and graphs to display critical metrics such as Creatives Vs Views, Channels Vs Views, and Views Trend Over Time.
- Collaborated closely with cross-functional teams to gather requirements, design solutions, and enhance the dashboard's usability and functionality for advertisers.

Education

10 Academy

Data Science, Machine Learning, Generative AI, Web 3

Addis Ababa University

Bachelor's degree, Bachelor of Software Engineering (Artificial Intelligence Stream)

A2SV

Competitive Programming | Coding Boot Camp | Software Development Project Phase
